DESCRIPTION DE LA VERSION

Version 6.3. This version contains selected variables from the original census micro data plus harmonized variables from the IPUMS International database.

DATE DE PRODUCTION

2014-08-08

Aperçu

RÉSUMÉ

IPUMS-International is an effort to inventory, preserve, harmonize, and disseminate census microdata from around the world. The project has collected the world's largest archive of publicly available census samples. The data are coded and documented consistently across countries and over time to facilitate comparative research. IPUMS-International makes these data available to qualified researchers free of charge through a web dissemination system.

The IPUMS project is a collaboration of the Minnesota Population Center, National Statistical Offices, and international data archives. Major funding is provided by the U.S. National Science Foundation and the Demographic and Behavioral Sciences Branch of the National Institute of Child Health and Human Development. Additional support is provided by the University of Minnesota Office of the Vice President for Research, the Minnesota Population Center, and Sun Microsystems.

UNITÉS D'ANALYSE

Household

Champ

NOTES
UNITS IDENTIFIED:

- Dwellings: No
- Vacant units: No
- Households: Yes
- Individuals: Yes
- Group quarters: Yes
- Special populations: Homeless; nomads

UNIT DESCRIPTIONS:

- Households: A standard household is a person or a group of people related or not, living in the same housing unit, often taking their meals together and working together on the other essential needs. This group generally recognizes the authority of one person who is called the Head of Household.

- Group quarters: This is a group of people, who for non-family reasons which are mainly related to profession, health, school, denomination, or detention, live together in a specialized establishment or institution like a workers camp, military barracks, dormitories, a hospital with rooms, a convent, an orphanage, a prison.

TOPICS

VERSION DU DOCUMENT DDI

Version 6.4 avant la diffusion sur ANADOC (cette version a été téléchargée sur le site <http://catalog.ihsn.org/index.php/catalog/3552> pour la diffusion sur ANADOC) , Version 6.3. Documentation of census data and harmonized variables as found in IPUMS-International. The International Household Survey Network (IHSN) contracted IPUMS International for generating DDI and Dublin Core-compliant metadata related to population and housing census datasets from developing countries. The objective was to provide countries with detailed metadata in a format compatible with the DDI standard used by most of these countries, with a view to guarantee the preservation of the data and metadata, and the publishing of metadata.

The intellectual rights (including copyright) for the data and metadata in IPUMS are retained by the countries under a Memorandum of Understanding with the contributing countries. IPUMS-International has distribution rights to the metadata and data. The XML documents generated by this process are viewed as a distribution of the metadata.

Echantillonnage

Méthode d'échantillonnage

MICRODATA SOURCE: Central Bureau of Census and Population Studies

SAMPLE DESIGN: Systematic sample of every 10th dwelling with a random start, drawn by MPC

SAMPLE FRACTION: 10%

SAMPLE UNIVERSE: Systematic sample of every 10th dwelling with a random start, drawn by MPC

SAMPLE SIZE (person records): 1,772,359

Taux de réponse

UNDERCOUNT: No available estimate

Pondération

Self-weighting (expansion factor=10)

Questionnaires

Aperçu

Four forms: Standard household questionnaire, communal household questionnaire, nomad questionnaire, and homeless questionnaire

V189	CM05A505	Class of worker	discrete	numeric	Economic activity for persons aged 6 years and above [Questions 27 to 33 were asked of persons aged 6 years and older.] 29. In the main job held last week, was the person...? [Question 29 was asked of persons aged 6 years and older who reported working in the last 7 days, per Question 28.] [] A permanent wage (salary earner) [] A temporary wage (salary earner) [] An employer [] An independent, self-employed worker [] A family helper [] A wage-earning apprentice [] A non-wage-earning apprentice
V190	CM05A506	Occupation	discrete	numeric	Economic activity for persons aged 6 years and above [Questions 27 to 33 were asked of persons aged 6 years and older.] 30. Occupation What is the person's main status in the work being done? ___ [Question 30 was asked of persons aged 6 years and older who reported working in the last 7 days, per Question 28.]
V191	CM05A507	Type of employment	discrete	numeric	Economic activity for persons aged 6 years and above [Questions 27 to 33 were asked of persons aged 6 years and older.] 31. Type of employment _ [Question 31 was asked of persons aged 6 years and older who reported working in the last 7 days, per Question 28.]
V192	CM05A508	Sector of employment	discrete	numeric	Economic activity for persons aged 6 years and above [Questions 27 to 33 were asked of persons aged 6 years and older.] 32. Sector of employment _ [Question 32 was asked of persons aged 6 years and older who reported working in the last 7 days, per Question 28.]
V193	CM05A509	Industry	discrete	numeric	Economic activity for persons aged 6 years and above [Questions 27 to 33 were asked of persons aged 6 years and older.] 33. Line of business In what industry, business or service is the person working? ___ [Question 33 was asked of persons aged 6 years and older who reported working in the last 7 days, per Question 28.] See code list
V194	CM05A510	Number of male live births	discrete	numeric	Females 12 and above [Questions 34-36 were asked of females age 12 and older.] 34. How many live births has she ever had? __ Male __ Female
V195	CM05A511	Number of female live births	discrete	numeric	Females 12 and above [Questions 34-36 were asked of females age 12 and older.] 34. How many live births has she ever had? __ Male __ Female
V196	CM05A512	Number of male children still living	discrete	numeric	Females 12 and above [Questions 34-36 were asked of females age 12 and older.] 35. How many are still living? __ Male __ Female
V197	CM05A513	Number of female children still living	discrete	numeric	Females 12 and above [Questions 34-36 were asked of females age 12 and older.] 35. How many are still living? __ Male __ Female
V198	CM05A514	Male live births in last 12 months	discrete	numeric	Females 12 and above [Questions 34-36 were asked of females age 12 and older.] 36. How many live births did you have within the last 12 months? __ Male __ Female
V199	CM05A515	Female live births in last 12 months	discrete	numeric	Females 12 and above [Questions 34-36 were asked of females age 12 and older.] 36. How many live births did you have within the last 12 months? __ Male __ Female
V200	CM05A516	Children born alive	discrete	numeric	Females 12 and above [Questions 34-36 were asked of females age 12 and older.] 34. How many live births has she ever had? __ Male __ Female
V201	CM05A517	Children still living	discrete	numeric	Females 12 and above [Questions 34-36 were asked of females age 12 and older.] 35. How many are still living? __ Male __ Female
V202	CM05A518	Children born in last 12 months	discrete	numeric	Females 12 and above [Questions 34-36 were asked of females age 12 and older.] 36. How many live births did you have within the last 12 months? __ Male __ Female
V203	CM05A519	Heard of AIDS	discrete	numeric	41. Have you ever heard of HIV/AIDS? [] 1 Yes [] 2 No

ID	Nom	Libellé	Type	Format	Question
V204	CM05A520	Transmission of AIDS	discrete	numeric	42. What ways of transmission of HIV do you know? [] 1 Sexual contact [] 2 Contact with infected blood [] 4 From mother to infant (child) [] 8 Use of stained objects [] 16 Don't know

Record type (RECTYPE)

Fichier: CMR2005-H-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: character	Invalide: 0
Largeur: 1	

Description

RECTYPE identifies the type of record for the case: household or person.

NOTE: RECTYPE is an alphabetic (character string) variable with a value of 'H' for household records and 'P' for person records. RECTYPE will not appear as a variable in the default rectangular extracts produced by the data extract system. It is only available in hierarchical extracts, to distinguish between the two record types.

Country (CNTRY)

Fichier: CMR2005-H-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 3	
Décimales: 0	
Intervalle: 32-894	

Description

CNTRY gives the country from which the sample was drawn. The codes assigned to each country are those used by the UN Statistics Division and the ISO (International Organization for Standardization).

Year (YEAR)

Fichier: CMR2005-H-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 4	
Décimales: 0	
Intervalle: 1960-2011	

Description

YEAR gives the year in which the census was taken.

IPUMS sample identifier (SAMPLE)

Fichier: CMR2005-H-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 4	
Décimales: 0	
Intervalle: 321-8943	

Description

SAMPLE identifies the IPUMS sample from which the case is drawn. Each sample receives a unique 4-digit code. The first 3 digits are the ISO/UN codes used in CNTRY, and the last digit identifies the sample within the country ordered by census year.

Household serial number (SERIAL)

Fichier: CMR2005-H-H

Aperçu

Type: Continu	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 10	
Décimales: 0	

Description

SERIAL is an identifying number unique to each household in a given sample. All person records are assigned the same serial number as the household record that they follow. (Person records also have their own unique identifiers -- see PERNUM.) The combination of SAMPLE and SERIAL provides a unique identifier for every household in the IPUMS-International database; SAMPLE, SERIAL and PERNUM uniquely identify every person in the database.

SERIAL can be used to identify dwellings in some samples. In these samples, the first 7 digits of SERIAL provide the dwelling number common to all households that were sampled from the same structure. The last three digits give the sequence of the household within the dwelling. The following is a list of samples in which dwellings can be inferred:

Chile 1970, 1992, 2002
 Colombia 1993, 2005
 Costa Rica 1984, 2000
 Cuba 2002
 Dominican Republic 1981, 2002, 2010
 Ecuador 1990, 2001
 Germany 1971
 Hungary 1980, 1990, 2001
 Jamaica 1982, 1991, 2001
 Malaysia 1970, 1991, 2000
 Mexico 1995, 1990, 2000, 2005
 Nigeria 2006
 Panama 2000
 Peru 1993, 2007
 Portugal 1981, 1991, 2001
 Spain 1991
 Uruguay 2011
 Venezuela 1990, 2001
 Vietnam 1989

In all other samples, the last 3 digits are always zeroes.

SERIAL was constructed for IPUMS-International, and has no relation to the serial number in the original datasets.

Number of person records in the household (PERSONS)

Fichier: CMR2005-H-H

Aperçu

Type: Continu	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 3	
Décimales: 0	

Description

PERSONS indicates how many person records are included in the household (i.e., the number of person records associated with the household record in the sample). These person records will all have the same serial number (SERIAL) as the household record. The information contained in the household record will normally apply to all of these persons.

Household weight (WTHH)

Fichier: CMR2005-H-H

Aperçu

Household weight (WTHH)

Fichier: CMR2005-H-H

Type: Continu
Format: numeric
Largeur: 8
Décimales: 2

Enregistrements valides: 0
Invalide: 0

Description

WTHH indicates the number of households in the population represented by the household in the sample.

For the samples that are truly weighted (see the comparability discussion), WTHH must be used to yield accurate household-level statistics.

NOTE: WTHH has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

Subsample number (SUBSAMP)

Fichier: CMR2005-H-H

Aperçu

Type: Discrète
Format: numeric
Largeur: 2
Décimales: 0
Intervalle: 0-99

Enregistrements valides: 0
Invalide: 0

Description

SUBSAMP allocates each case to one of 100 subsample replicates, randomly numbered from 0 to 99. Each subsample is nationally representative and preserves any stratification of the sample from which it is drawn. Users who need a representative subset of a sample can use SUBSAMP to select their cases. For example, to randomly extract 10% of the cases from a sample, select any 10 of the 100 subsamples.

Group quarters status (GQ)

Fichier: CMR2005-H-H

Aperçu

Type: Discrète
Format: numeric
Largeur: 2
Décimales: 0
Intervalle: 0-99

Enregistrements valides: 0
Invalide: 0

Description

GQ identifies households as vacant dwellings, group quarters, or private households. Group quarters -- collective dwellings -- are generally institutions and other group living arrangements such as rooming houses and boarding schools.

Institutions often retain persons under formal supervision or custody, such as correctional institutions, military barracks, asylums, or nursing homes. Educational and religious group dwellings (e.g., boarding schools, convents, monasteries, etc.) are also included in the institutional classification.

Group quarter designations are often useful for understanding the universe of households that answered questions about household characteristics. Censuses will often exclude group quarters from such questions.

Number of unrelated persons (UNREL)

Fichier: CMR2005-H-H

Aperçu

Number of unrelated persons (UNREL)

Fichier: CMR2005-H-H

Type: Discrète
Format: numeric
Largeur: 1
Décimales: 0
Intervalle: 0-9

Enregistrements valides: 0
Invalide: 0

Description

UNREL indicates the number of persons in the household who are unrelated to the head.

Urban-rural status (URBAN)

Fichier: CMR2005-H-H

Aperçu

Type: Discrète
Format: numeric
Largeur: 1
Décimales: 0
Intervalle: 0-9

Enregistrements valides: 0
Invalide: 0

Description

URBAN indicates whether the household was located in a place designated as urban or as rural.

Continent and region of country (REGIONW)

Fichier: CMR2005-H-H

Aperçu

Type: Discrète
Format: numeric
Largeur: 2
Décimales: 0
Intervalle: 11-54

Enregistrements valides: 0
Invalide: 0

Description

REGIONW identifies the continent and region of each country.

1st subnational geographic level, world [consistent boundaries over time] (GEOLEV1)

Fichier: CMR2005-H-H

Aperçu

Type: Discrète
Format: numeric
Largeur: 6
Décimales: 0
Intervalle: 32002-894010

Enregistrements valides: 0
Invalide: 0

Description

GEOLEV1 indicates the major administrative unit in which the household was enumerated. The variable incorporates the geographies for every country, to enable cross-national geographic analysis over time. First administrative units in GEOLEV1 have been spatiotemporally harmonized to provide spatially consistent boundaries across samples in each country.

Province, Cameroon [Level 1; consistent boundaries over time] (GEO1A_CM)

Fichier: CMR2005-H-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 6	
Décimales: 0	
Intervalle: 120002-120010	

Description

GEO1A_CM identifies the household's province within Cameroon, which is the major administrative level of the country. GEO1A_CM is spatially harmonized accounting for political boundary changes across census years. Some detail is lost in harmonization; see the comparability discussion. A GIS map (in shapefile format), corresponding to GEO1A_CM codes can be downloaded from the GIS Boundary files page in the IPUMS International web site.

Lower level geographical units can be found in the variables GEO2B_CM and ARRNDCM . Other geography variables include GEO1B_CM.

Province, Cameroon [Level 1; inconsistent boundaries, harmonized by name] (GEO1B_CM)

Fichier: CMR2005-H-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 2	
Décimales: 0	
Intervalle: 1-10	

Description

GEO1B_CM identifies the household's province within Cameroon, which is the major administrative level of the country. GEO1B_CM is harmonized solely based on the names of the geographical unit. It does not take into account the changes that may have occurred in the political boundaries of the units. A GIS map (in shapefile format), corresponding to the most recent census year can be downloaded from the GIS Boundary files page in the IPUMS International web site.

Lower level geographical units can be found in the variable GEO2B_CM (departments) and ARRNDCM (districts).

Department, Cameroon [Level 2; inconsistent boundaries, harmonized by name] (GEO2B_CM)

Fichier: CMR2005-H-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 2	
Décimales: 0	
Intervalle: 1-62	

Description

GEO2B_CM identifies the department within Cameroon in which the household was enumerated. It is the second-largest-scale geographic identifier available in the Cameroon samples. GEO2B_CM is harmonized solely based on the names of the geographical unit. It does not take into account the changes that may have occurred in the political boundaries of the units.

Provinces are the major administrative level for the country; they are available in GEO1A_CM . Lower level geographic units (districts) are available in ARRNDCM . Other geography variables include GEO1B_CM.

Arrondissement, Cameroon (ARRNDCM)

Fichier: CMR2005-H-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 4	
Décimales: 0	
Intervalle: 101-5899	

Description

ARRNDCM identifies the arrondissement (subdivision) of residence of the household within Cameroon. It is the third-largest geographic identifier available in the Cameroon samples. ARRNDCM is harmonized solely based on the names of the geographical unit. It does not take into account the changes that may have occurred in the political boundaries of the units.

Arrondissements with a population under 20,000 are grouped together within the same province for confidentiality purposes.

Larger geographic units for Cameroon are reported in the variables GEO1A_CM for provinces and GEO2B_CM for departments. Other geography variables include GEO1B_CM.

Ownership of dwelling [general version] (OWNRSHP)

Fichier: CMR2005-H-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 1	
Décimales: 0	
Intervalle: 0-9	

Description

OWNRSHP indicates whether a member of the household owned the housing unit. Households that acquired their unit with a mortgage or other lending arrangement were understood to "own" their unit even if they had not yet completed repayment. For those that did not own their housing unit, several options were possible: renting (from various types of owners), subletting, usufruct, and de facto occupation.

Ownership of dwelling [detailed version] (OWNRSHPD)

Fichier: CMR2005-H-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 3	
Décimales: 0	
Intervalle: 0-999	

Description

OWNRSHP indicates whether a member of the household owned the housing unit. Households that acquired their unit with a mortgage or other lending arrangement were understood to "own" their unit even if they had not yet completed repayment. For those that did not own their housing unit, several options were possible: renting (from various types of owners), subletting, usufruct, and de facto occupation.

Number of international migrants (INTMIG1)

Fichier: CMR2005-H-H

Aperçu

Number of international migrants (INTMIG1)

Fichier: CMR2005-H-H

Type: Discrète
 Format: numeric
 Largeur: 2
 Décimales: 0
 Intervalle: 0-99

Enregistrements valides: 0
 Invalide: 0

Description

INTMIG1 indicates the number of people from the household who traveled to another country to live and have not permanently returned.

Electricity (ELECTRC)

Fichier: CMR2005-H-H

Aperçu

Type: Discrète
 Format: numeric
 Largeur: 1
 Décimales: 0
 Intervalle: 0-9

Enregistrements valides: 0
 Invalide: 0

Description

ELECTRC indicates whether the household had access to electricity.

Sewage (SEWAGE)

Fichier: CMR2005-H-H

Aperçu

Type: Discrète
 Format: numeric
 Largeur: 2
 Décimales: 0
 Intervalle: 0-99

Enregistrements valides: 0
 Invalide: 0

Description

SEWAGE indicates whether the household has access to a sewage system or septic tank.

Cooking fuel (FUELCK)

Fichier: CMR2005-H-H

Aperçu

Type: Discrète
 Format: numeric
 Largeur: 2
 Décimales: 0
 Intervalle: 0-99

Enregistrements valides: 0
 Invalide: 0

Description

FUELCK indicates the predominant type of fuel or energy used for cooking.

Trash disposal (TRASH)

Fichier: CMR2005-H-H

Aperçu

Trash disposal (TRASH)

Aperçu

Wall or building material (WALL)

Fichier: CMR2005-H-H

Type: Discrète
 Format: numeric
 Largeur: 3
 Décimales: 0
 Intervalle: 0-999

Enregistrements valides: 0
 Invalide: 0

Description

This variable indicates the primary material used in the construction of the dwelling, particularly the dwelling's exterior walls.

Roof material (ROOF)

Fichier: CMR2005-H-H

Aperçu

Type: Discrète
 Format: numeric
 Largeur: 2
 Décimales: 0
 Intervalle: 0-99

Enregistrements valides: 0
 Invalide: 0

Description

This variable indicates the dwelling's predominant roofing material.

Number of deaths in household last year (MORTNUM)

Fichier: CMR2005-H-H

Aperçu

Type: Discrète
 Format: numeric
 Largeur: 1
 Décimales: 0
 Intervalle: 0-9

Enregistrements valides: 0
 Invalide: 0

Description

MORTNUM indicates the number of deaths in the household in the past year.

Any deaths in household last year (ANYMORT)

Fichier: CMR2005-H-H

Aperçu

Type: Discrète
 Format: numeric
 Largeur: 1
 Décimales: 0
 Intervalle: 1-9

Enregistrements valides: 0
 Invalide: 0

Description

ANYMORT indicates whether there were any deaths in the household in the past year.

Household classification (HHTYPE)

Fichier: CMR2005-H-H

Aperçu

Household classification (HHTYPE)

Fichier: CMR2005-H-H

Type: Discrète
Format: numeric
Largeur: 2
Décimales: 0
Intervalle: 0-99

Enregistrements valides: 0
Invalide: 0

Description

HHTYPE is a constructed variable that describes the composition of households. HHTYPE is constructed from information in RELATE (relationship to head), from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father), and from information on group quarters status, GQ.

Number of families in household (NFAMS)

Fichier: CMR2005-H-H

Aperçu

Type: Discrète
Format: numeric
Largeur: 1
Décimales: 0
Intervalle: 0-9

Enregistrements valides: 0
Invalide: 0

Description

NFAMS is a constructed variable that indicates the number of families within each household. A "family" is any group of persons related by blood, adoption, or marriage. An unrelated individual within the household is considered a separate family. Thus, a household consisting of a widow and her servant contains two families; a household consisting of a large, multiple-generation extended family with no lodgers or servants would count as a single family.

NFAMS is constructed from information in RELATE (relationship to head) and from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father). See those variable descriptions for more detail.

Number of married couples in household (NCOUPLS)

Fichier: CMR2005-H-H

Aperçu

Type: Discrète
Format: numeric
Largeur: 1
Décimales: 0
Intervalle: 0-9

Enregistrements valides: 0
Invalide: 0

Description

NCOUPLS is a constructed variable indicating the number of married/in-union couples within a household.

NCOUPLS is constructed using the IPUMS-International pointer variable SPLOC (spouse's location in the household).

Number of mothers in household (NMOTHR)

Fichier: CMR2005-H-H

Aperçu

Type: Discrète
Format: numeric

Question littérale

59. Where is the house situated?

- Developed slope
- Natural slope
- Valley
- Swampy valley
- Flat land
- Hilltop or summit
- Surrounding of petrol depots
- Surrounding of polluting factories
- Airport surrounding
- Railway surrounding
- Reclaimed area
- Surrounding mountains or volcanic lakes
- Surrounding high tension pole
- Other

Instructions aux enquêteurs

Site of dwelling (CM05A093)

Fichier: CMR2005-H-H

59. Settlement site

The settlement site is the precise location where the structure housing the household is built. It consists of two elements: the topography and the environmental risks.

The codes of the terms for this variable are:

- 01-Equiped mountainside: the site of the slope having benefited from development of the building site (Roads System and Public Utilities: Roads, gutters, sewers?) and build according to urban standards.
- 02-Unequiped mountainside: the site of the slope of the dwellings were constructed in an unregulated manner
- 03-Shoal: the settlement site is in a valley without any water connection, but presenting risks of flooding by rainwater.
- 04-Swampy shoal: the settlement site is in a valley with water flow or with a swamp and presenting an elevated risk of flooding
- 05-Flat zone: settlement site is flat which can present with a risk of flooding during rainy season or by floodwaters; example, flooded plains
- 06-Peak/summit: settlement site on a hill or a mountain presenting a risk of collapse/fallen rock
- 07-Near petroleum warehouses: the settlement site if around petroleum warehouses and presents risks in case of fire; example, around cisterns, around gas stations, etc.
- 08-Near polluting factories: settlement site is close to factories producing liquid, gaseous, or solid toxic waste. Example: chemical industries, refineries, metallurgic industries, and sawmills
- 09-Near airport: settlement site is inside the security limits of an airport
- 10- Near a railway: the settlement site is close to rails and presents risks in the event of a train accident.
- 11-Drains: Settlement site is close to equipment that channels water and stream and presents a flood risk related to the overflow of water
- 12-Near mountain or volcanoes
- 13-Near high-tension power cables
- 14-Other: All other settlement sites presenting no risk

-Mark in the proper space the code of the response (resulting from your evaluation)

Accessibility means (CM05A094)

Person number (PERNUM)

Fichier: CMR2005-P-H

Aperçu

Type: Continu	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 3	
Décimales: 0	

Description

PERNUM numbers all persons within each household consecutively (starting with "1" for the first person record of each household). When combined with SAMPLE and SERIAL, PERNUM uniquely identifies each person in the IPUMS-International database.

Person weight (WTPER)

Fichier: CMR2005-P-H

Aperçu

Type: Continu	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 8	
Décimales: 2	

Description

WTPER indicates the number of persons in the actual population represented by the person in the sample.

For the samples that are truly weighted (see the comparability discussion), WTPER must be used to yield accurate statistics for the population.

NOTE: WTPER has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

Residence status: de facto, de jure (RESIDENT)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 1	
Décimales: 0	
Intervalle: 1-9	

Description

RESIDENT identifies whether an enumerated person is a household resident or a visitor and whether she or he was present at the time of enumeration. This variable is available only in samples that enumerated both de facto and de jure residents. It can be used to eliminate the double-counting of persons who were enumerated both at their permanent residence and at the residence they were visiting on census night.

De jure population: present residents and absent residents.

De facto population: present residents and visitors/non-residents.

Mother's location in household (MOMLOC)

Fichier: CMR2005-P-H

Aperçu

Type: Continu	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 3	
Décimales: 0	

Description

MOMLOC is a constructed variable that indicates whether or not the person's mother lived in the same household and, if so, gives the person number of the mother (see PERNUM). MOMLOC makes it easy for researchers to link the characteristics of children and their (probable) mothers.

The method by which probable child-mother links are identified is described in PARRULE.

The general design of MOMLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly.

Note: MOMLOC identifies social relationships (such as stepmother and adopted mother) as well as biological relationships. The variable STEPMOM is designed to identify some of these social relationships.

Father's location in household (POPLOC)

Fichier: CMR2005-P-H

Aperçu

Type: Continu	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 3	
Décimales: 0	

Description

POPLOC is a constructed variable that indicates whether or not the person's father lived in the same household and, if so, gives the person number of the father (see PERNUM). POPLOC makes it easy for researchers to link the characteristics of children and their (probable) fathers.

The method by which probable child-father links are identified is described in PARRULE.

The general design of POPLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly.

Note: POPLOC identifies social relationships (such as stepfather and adopted father) as well as biological relationships. The variable STEPPOP is designed to identify some of these social relationships.

Spouse's location in household (SPLOC)

Fichier: CMR2005-P-H

Aperçu

Type: Continu	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 3	
Décimales: 0	

Description

SPLOC is a constructed variable that indicates whether or not the person's spouse lived in the same household and, if so, gives the person number (PERNUM) of the spouse. SPLOC makes it easy for researchers to link the characteristics of (probable) spouses.

The method by which probable spouse-spouse links are identified is described in SPRULE.

The general design of SPLOC and other constructed variables is modeled on the methods developed for IPUMS-USA "Family Interrelationships", but the details vary significantly.

Rule for linking parent (PARRULE)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 2	
Décimales: 0	
Intervalle: 0-52	

Description

PARRULE describes the criteria by which the IPUMS-International variables MOMLOC and POPLOC linked the person to a probable mother and/or father.

IPUMS-International establishes child-parent links according to five basic rules, and PARRULE gives the number of the rule that applied to the link in question. A link to any parent automatically generates a second link to that parent's spouse or partner, so only one rule is needed to describe both MOMLOC and POPLOC.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

Rule for linking spouse (SPRULE)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 2	
Décimales: 0	
Intervalle: 0-6	

Description

SPRULE explains the criteria by which the IPUMS-International variable SPLOC linked the person to his/her probable spouse.

IPUMS-International establishes spouse-spouse links according to five basic rules, and SPRULE gives the number of the rule that applied to the link in question. A sixth rule identifies sample-specific linking procedures only imposed in selected instances.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

Probable stepmother (STEPMOM)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 1	
Décimales: 0	
Intervalle: 0-6	

Description

Probable stepmother (STEPMOM)

Fichier: CMR2005-P-H

STEPMOM indicates whether a person's mother, as identified by MOMLOC, was most probably not the person's biological mother. Non-zero values of STEPMOM explain why it is probable that the person's mother was a step- or adopted mother. A value of 0 indicates no likely stepmother because (1) the mother identified in MOMLOC was probably the biological mother or (2) there is no mother of this person present in the household.

The codes for STEPMOM are as follows:

- 0 = Biological mother or no mother of this person present in household.
- 1 = Mother has no children borne or surviving.
- 2 = Child reports mother is deceased.
- 3 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner, stepchild/child-in-law).
- 4 = Mother reports no children in the home.
- 5 = Age difference between mother and child was less than 12 or greater than 54 years.
- 6 = Child exceeds known fertility of mother.

See PARRULE for a description of the linking process.

Users should note that there are many stepmothers and adopted mothers in the population that cannot be identified with information available in the censuses. Therefore, STEPMOM will always under-represent their actual number in the population.

Probable stepfather (STEPPOP)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 1	
Décimales: 0	
Intervalle: 0-3	

Description

STEPPOP indicates whether a person's father, as identified by POPLOC, was most probably not the person's biological father. Non-zero values of STEPPPOP explain why it is probable that the person's father was a step- or adopted father. A value of 0 indicates no likely stepfather because (1) the father identified in POPLOC was probably the biological father or (2) there is no father of this person present in the household.

The codes for STEPPPOP are as follows:

- 0 = Biological father or no father of this person present in household.
- 1 = Child reports father is deceased.
- 2 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner; stepchild/child-in-law).
- 3 = Age difference between father and child was less than 12 or greater than 54 years.

See PARRULE for a description of the linking process.

Users should note that there are many stepfathers and adopted fathers in the population that cannot be identified with information available in the censuses. Therefore, STEPPPOP will always under-represent their actual number in the population.

Man with more than one wife linked (POLYMAL)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 1	
Décimales: 0	
Intervalle: 0-1	

Man with more than one wife linked (POLYMAL)

Fichier: CMR2005-P-H

Description

POLYMAL indicates if a man had more than one wife linked to him in the constructed IPUMS variable SPLOC -- Spouse's Location in Household.

The point of POLYMAL is to facilitate using SPLOC in samples that identify polygamy. Some statistical matching procedures expect to find only one matching record for each subject record.

Woman is second or higher order wife (POLY2ND)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète
Format: numeric
Largeur: 1
Décimales: 0
Intervalle: 0-1

Enregistrements valides: 0
Invalide: 0

Description

POLY2ND indicates if a woman was the second or higher order wife linked to a husband in the constructed IPUMS variable SPLOC -- Spouse's Location in Household. The variable does not suggest the actual marital order of wives, only their relative positions in the person order of the household as it was enumerated.

The point of POLY2ND is to facilitate using SPLOC in samples that identify polygamy. Some statistical matching procedures expect to find only one matching record for each subject record.

Family unit membership (FAMUNIT)

Fichier: CMR2005-P-H

Aperçu

Type: Continu
Format: numeric
Largeur: 2
Décimales: 0

Enregistrements valides: 0
Invalide: 0

Description

FAMUNIT is a constructed variable indicating to which family within the household a person belongs.

All persons related to the household head receive a 1 (see RELATE). Each secondary family or secondary individual receives a higher code. For purposes of FAMUNIT, secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

Number of own family members in household (FAMSIZE)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète
Format: numeric
Largeur: 2
Décimales: 0
Intervalle: 1-99

Enregistrements valides: 0
Invalide: 0

Description

Number of own family members in household (FAMSIZE)

Fichier: CMR2005-P-H

FAMSIZE counts the number of the person's own family members living in the household with her/him, including the person her/himself. These include all persons related to the person by blood, adoption, or marriage as indicated by the census forms or inferred from them.

FAMSIZE is calculated from the units identified in the IPUMS constructed variable FAMUNIT (family unit membership). The primary family is defined as all persons related to the head in the RELATE variable. Secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

Number of own children in household (NCHILD)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 1	
Décimales: 0	
Intervalle: 0-9	

Description

NCHILD provides a count of the person's own children living in the household with her or him. These include all children linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

Number of own children under age 5 in household (NCHLT5)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 1	
Décimales: 0	
Intervalle: 0-9	

Description

NCHLT5 provides a count of the person's own children under age five living in the household with her or him. These include all children linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

Age of eldest own child in household (ELDCH)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 2	
Décimales: 0	
Intervalle: 0-99	

Description

ELDCH gives the age of the person's oldest own child living in the household with her or him. These include all children linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

ELDCH is top-coded at age 50 or older.

Age of youngest own child in household (YNGCH)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète
Format: numeric
Largeur: 2
Décimales: 0
Intervalle: 0-99

Enregistrements valides: 0
Invalide: 0

Description

YNGCH gives the age of the person's youngest own child living in the household with her or him. These include all children linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

YNGCH is top-coded at age 50 or older.

Relationship to household head [general version] (RELATE)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète
Format: numeric
Largeur: 1
Décimales: 0
Intervalle: 1-9

Enregistrements valides: 0
Invalide: 0

Description

RELATE describes the relationship of the individual to the head of household (sometimes called the householder or reference person).

Relationship to household head [detailed version] (RELATED)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète
Format: numeric
Largeur: 4
Décimales: 0
Intervalle: 1000-9999

Enregistrements valides: 0
Invalide: 0

Description

RELATE describes the relationship of the individual to the head of household (sometimes called the householder or reference person).

Age (AGE)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète
Format: numeric
Largeur: 3
Décimales: 0
Intervalle: 0-999

Enregistrements valides: 0
Invalide: 0

Description

AGE gives age in years as of the person's last birthday prior to or on the day of enumeration.

Sex (SEX)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 1	
Décimales: 0	
Intervalle: 1-9	

Description

SEX reports the sex (gender) of the respondent.

Marital status [general version] (MARST)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 1	
Décimales: 0	
Intervalle: 0-9	

Description

MARST describes the person's current marital status according to law or custom. Individuals who remarried should report the status relevant to their most recent marriage. Census instructions rarely explicitly limit marital status to strictly legal unions.

Note regarding universe: The lowest age at which a person can be anything but "never married" varies among samples.

Marital status [detailed version] (MARSTD)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 3	
Décimales: 0	
Intervalle: 0-999	

Description

MARSTD describes the person's current marital status according to law or custom. Individuals who remarried should report the status relevant to their most recent marriage. Census instructions rarely explicitly limit marital status to strictly legal unions.

Note regarding universe: The lowest age at which a person can be anything but "never married" varies among samples.

Consensual union (CONSENS)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 1	
Décimales: 0	
Intervalle: 1-9	

Description

CONSENS indicates whether the respondent was in a consensual union -- a de facto marriage.

Polygamous union (POLYGAM)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 2	
Décimales: 0	
Intervalle: 0-99	

Description

POLYGAM indicates whether the respondent was in a polygamous union and, in some samples, the number of wives or the rank order of the wife.

Year of birth (BIRTHYR)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 4	
Décimales: 0	
Intervalle: 0-9999	

Description

BIRTHYR gives the person's year of birth.

Month of birth (BIRTHMO)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 2	
Décimales: 0	
Intervalle: 1-99	

Description

BIRTHMO indicates the person's month of birth.

Children ever born (CHBORN)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 2	
Décimales: 0	
Intervalle: 0-99	

Description

CHBORN reports the number of children ever born to each woman of whom the question was asked. In most samples, women were to report all live births by all fathers, whether or not the child was still living.

Children surviving (CHSURV)

Fichier: CMR2005-P-H

Children surviving (CHSURV)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 2	
Décimales: 0	
Intervalle: 0-99	

Description

CHSURV reports the number of children born to a woman who were still living at the time of the census.

Number of female children ever born (CHBORNF)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 2	
Décimales: 0	
Intervalle: 0-99	

Description

CHBORNF indicates the number of female children ever born to a woman. Only live births are counted.

Number of male children ever born (CHBORNM)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 2	
Décimales: 0	
Intervalle: 0-99	

Description

CHBORNM indicates the number of male children ever born to a woman. Only live births are counted.

Number of female children surviving (CHSURVF)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 2	
Décimales: 0	
Intervalle: 0-99	

Description

CHSURVF indicates the number of female children ever born to a woman who were still living at the time of the census.

Number of male children surviving (CHSURVM)

Fichier: CMR2005-P-H

Aperçu

Number of male children surviving (CHSURVM)

Fichier: CMR2005-P-H

Type: Discrète
 Format: numeric
 Largeur: 2
 Décimales: 0
 Intervalle: 0-99

Enregistrements valides: 0
 Invalide: 0

Description

CHSURVM indicates the number of male children ever born to a woman who were still living at the time of the census.

Number of births last year (BRTHLYR)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète
 Format: numeric
 Largeur: 1
 Décimales: 0
 Intervalle: 0-9

Enregistrements valides: 0
 Invalide: 0

Description

BRTHLYR indicates whether any -- and in most cases how many -- children were born to a woman in the past twelve months.

Mortality status of mother (MORTMOT)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète
 Format: numeric
 Largeur: 1
 Décimales: 0
 Intervalle: 1-9

Enregistrements valides: 0
 Invalide: 0

Description

MORTMOT indicates whether the person's biological mother was still living at the time of the census.

Mortality status of father (MORTFAT)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète
 Format: numeric
 Largeur: 1
 Décimales: 0
 Intervalle: 1-9

Enregistrements valides: 0
 Invalide: 0

Description

MORTFAT indicates whether the person's biological father was still living.

Arrondissement of birth, Cameroon (BPLCM)

Fichier: CMR2005-P-H

Aperçu

Arrondissement of birth, Cameroon (BPLCM)

Fichier: CMR2005-P-H

Type: Discrète
 Format: numeric
 Largeur: 4
 Décimales: 0
 Intervalle: 101-9999

Enregistrements valides: 0
 Invalide: 0

Description

BPLCM indicates the district in Cameroon in which the person was born.

Citizenship (CITIZEN)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète
 Format: numeric
 Largeur: 1
 Décimales: 0
 Intervalle: 1-9

Enregistrements valides: 0
 Invalide: 0

Description

CITIZEN indicates the person's citizenship status within the country in which they were enumerated.

Country of citizenship (NATION)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète
 Format: numeric
 Largeur: 5
 Décimales: 0
 Intervalle: 0-99999

Enregistrements valides: 0
 Invalide: 0

Description

NATION indicates the person's country of citizenship.

Religion [general version] (RELIG)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète
 Format: numeric
 Largeur: 1
 Décimales: 0
 Intervalle: 0-9

Enregistrements valides: 0
 Invalide: 0

Description

RELIG indicates the person's religion, including "none."

Religion [detailed version] (RELIGD)

Fichier: CMR2005-P-H

Aperçu

Religion [detailed version] (RELIGD)

Fichier: CMR2005-P-H

Type: Discrète
 Format: numeric
 Largeur: 4
 Décimales: 0
 Intervalle: 0-9999

Enregistrements valides: 0
 Invalide: 0

Description

RELIG indicates the person's religion, including "none."

Speaks English (SPKENG)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète
 Format: numeric
 Largeur: 1
 Décimales: 0
 Intervalle: 1-9

Enregistrements valides: 0
 Invalide: 0

Description

SPKENG indicates whether the respondent could speak English or if English was the respondent's language of literacy.

School attendance (SCHOOL)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète
 Format: numeric
 Largeur: 1
 Décimales: 0
 Intervalle: 0-9

Enregistrements valides: 0
 Invalide: 0

Description

SCHOOL indicates whether or not the person attended school at the time of the census or within some specified period of time prior to the census.

Literacy (LIT)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète
 Format: numeric
 Largeur: 1
 Décimales: 0
 Intervalle: 0-9

Enregistrements valides: 0
 Invalide: 0

Description

LIT indicates whether or not the respondent could read and write in any language. A person is typically considered literate if he or she can both read and write. All other persons are illiterate, including those who can either read or write but cannot do both.

Educational attainment, international recode [general version] (EDATTAN)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète
Format: numeric
Largeur: 1
Décimales: 0
Intervalle: 0-9

Enregistrements valides: 0
Invalide: 0

Description

EDATTAN records the person's educational attainment in terms of the level of schooling completed (degree or other milestone). The emphasis on level completed is critical: a person attending the final year of secondary education receives the code for having completed lower secondary only -- and in some samples only primary.

EDATTAN does not necessarily reflect any particular country's definition of the various levels of schooling in terms of terminology or the number of years of schooling. EDATTAN is an attempt to merge -- into a single, roughly comparable variable -- samples that provide degrees, ones that provide actual years of schooling, and those that have some of both. In addition to EDATTAN, a country-specific education classification is provided which loses no information and reflects the particular educational system of that country (for example EDUCBR for Brazil, EDUCCL for Chile, and EDUCUS for the United States). As always, users can refer to the original education source variables for each sample, if they wish.

Many samples also give single years of schooling completed, recorded in YRSCHL. Some samples provide educational information in a form that could not be incorporated into EDATTAN.

Educational attainment, international recode [detailed version] (EDATTAND)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète
Format: numeric
Largeur: 3
Décimales: 0
Intervalle: 0-999

Enregistrements valides: 0
Invalide: 0

Description

EDATTAN records the person's educational attainment in terms of the level of schooling completed (degree or other milestone). The emphasis on level completed is critical: a person attending the final year of secondary education receives the code for having completed lower secondary only -- and in some samples only primary.

EDATTAN does not necessarily reflect any particular country's definition of the various levels of schooling in terms of terminology or the number of years of schooling. EDATTAN is an attempt to merge -- into a single, roughly comparable variable -- samples that provide degrees, ones that provide actual years of schooling, and those that have some of both. In addition to EDATTAN, a country-specific education classification is provided which loses no information and reflects the particular educational system of that country (for example EDUCBR for Brazil, EDUCCL for Chile, and EDUCUS for the United States). As always, users can refer to the original education source variables for each sample, if they wish.

Years of schooling (YRSCHL)

Fichier: CMR2005-P-H

Aperçu

Years of schooling (YRSCHL)

Fichier: CMR2005-P-H

Type: Discrète
Format: numeric
Largeur: 2
Décimales: 0
Intervalle: 0-99

Enregistrements valides: 0
Invalide: 0

Description

YRSCHL indicates the highest grade/level of schooling the person had completed, in years. Only formal schooling is counted. YRSCHL accounts for the number of years of study, regardless of the track or kind of study. Information on degree and/or technical track is available in EDATTAN. Years of schooling for Israel, categorized into intervals, are given in YRSCHL2.

Users should pay close attention to the top-codes in each sample, as discussed in the comparability section.

Educational attainment, Cameroon (EDUCCM)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète
Format: numeric
Largeur: 3
Décimales: 0
Intervalle: 100-999

Enregistrements valides: 0
Invalide: 0

Description

EDUCCM indicates the person's educational attainment in terms of the level of schooling completed.

Employment status [general version] (EMPSTAT)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète
Format: numeric
Largeur: 1
Décimales: 0
Intervalle: 0-9

Enregistrements valides: 0
Invalide: 0

Description

EMPSTAT indicates whether or not the respondent was part of the labor force -- working or seeking work -- over a specified period of time. Depending on the sample, EMPSTAT can also convey further information.

The first digit of EMPSTAT is fully comparable, and classifies the population into three groups: employed, unemployed, and inactive. The combination of employed and unemployed yields the total labor force. The second and third digits of EMPSTAT preserve additional information available for some countries and census years but not for others.

Employment status is sometimes referred to in other sources as "activity status".

Employment status [detailed version] (EMPSTATD)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète
Format: numeric
Largeur: 3
Décimales: 0
Intervalle: 0-999

Enregistrements valides: 0
Invalide: 0

Description

Employment status [detailed version] (EMPSTATD)

Fichier: CMR2005-P-H

EMPSTAT indicates whether or not the respondent was part of the labor force -- working or seeking work -- over a specified period of time. Depending on the sample, EMPSTAT can also convey further information.

The first digit of EMPSTAT is fully comparable, and classifies the population into three groups: employed, unemployed, and inactive. The combination of employed and unemployed yields the total labor force. The second and third digits of EMPSTAT preserve additional information available for some countries and census years but not for others.

Employment status is sometimes referred to in other sources as "activity status".

Occupation, ISCO general (OCCISCO)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 2	
Décimales: 0	
Intervalle: 1-99	

Description

OCCISCO records the person's primary occupation, coded according to the major categories in the International Standard Classification of Occupations (ISCO) scheme for 1988. For someone with more than one job, the primary occupation is typically the one in which the person had spent the most time or earned the most money.

Occupation, unrecoded (OCC)

Fichier: CMR2005-P-H

Aperçu

Type: Continu	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 4	
Décimales: 0	

Description

OCC records the person's primary occupation, classified according to the system used by the respective national census office at the time. For someone with more than one job, the primary occupation is usually the one in which the person spent the most time or earned the most money, although this may not have been explicit in the instructions for a specific census.

To ensure confidentiality, very small occupations are recoded to a residual category indicating the persons had an occupation, but the job title is not identified. The number of cases recoded should be too small to affect analyses.

Industry, general recode (INDGEN)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 3	
Décimales: 0	
Intervalle: 0-999	

Description

Industry, general recode (INDGEN)

Fichier: CMR2005-P-H

INDGEN recodes the industrial classifications of the various samples into twelve groups that can be fairly consistently identified across all available samples. The groupings roughly conform to the International Standard Industrial Classification (ISIC). The third digit of INDGEN retains important detail among the service industries that could not be consistently distinguished in all samples.

"Industry" refers to the activity or product of the establishment or sector in which a person worked.

Industry, unrecoded (IND)

Fichier: CMR2005-P-H

Aperçu

Type: Continu	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 5	
Décimales: 0	

Description

"Industry" refers to the activity or product of the establishment or sector in which the person worked. IND is classified according to the system used by the respective national census office at the time, and is not recoded by IPUMS-International.

Class of worker [general version] (CLASSWK)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 1	
Décimales: 0	
Intervalle: 0-9	

Description

CLASSWK refers to the status of an economically active person with respect to his or her employment -- that is, the type of explicit or implicit contract of employment with other persons or organizations that the person has in his/her job. In general, the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker. CLASSWK is related to EMPSTAT, which is used to define the universe in many samples.

Class of worker is often referred to as "status in employment" in other sources.

Class of worker [detailed version] (CLASSWKD)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 3	
Décimales: 0

In general, the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker. CLASSWK is related to EMPSTAT, which is used to define the universe in many samples.

Class of worker is often referred to as "status in employment" in other sources.

Migration status, 5 years (MGRATE5)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 2	
Décimales: 0	
Intervalle: 0-99	

Description

MGRATE5 indicates the person's place of residence 5 years ago. The first digit records movement across major administrative divisions and countries. The second digit reports movement across minor administrative divisions, for samples in which that detail is available.

Migration status, previous residence (MGRATEP)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 2	
Décimales: 0	
Intervalle: 0-99	

Description

MGRATEP indicates whether the person's most recent move (if any) was between minor administrative units, major units, or countries.

Country of previous residence (MGCTRY1)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 5	
Décimales: 0	
Intervalle: 0-99999	

Description

MGCTRY1 indicates the country of previous residence of international migrants. Persons who never lived abroad are coded to the "non-migrant" category.

Country of residence 5 years ago (MGCTRY2)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 5	
Décimales: 0	
Intervalle: 0-99999	

Description

MGCTRY2 indicates the country of residence 5 years ago for international migrants. Persons who did not live abroad 5 years earlier are coded to the "non-migrant" category.

Years residing in current locality (MGYRS1)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 2	
Décimales: 0	
Intervalle: 0-99	

Description

MGYRS1 indicates how many years the person has resided in their current locality of residence.

Arrondissement of previous residence, Cameroon (MIGCM1)

Fichier: CMR2005-P-H

Aperçu

Type: Discrète	Enregistrements valides: 0
Format: numeric	Invalide: 0
Largeur: 4

Relationship to head of household (CM05A468)

Fichier: CMR2005-P-H

Family relationship in the household: This is a relation by marriage, by blood, or by adoption that unites the member of the household together.

-Ask one of the following questions:

- Q. "Who is X to you?" if the question is asked to the head of household (HH);
- Q. "Who are you to the HH?" if the question is asked to the relevant person;
- Q. "Who is X to the HH?" if the question is asked to a third party who is neither the head of household, nor the person relevant to this question.

-Mark in the reserved spaces the family relationship code in the household for each person surveyed.

The Codes of the terms of the family relationship variable are the following:

- 10 = HH
- 11 = unmarried children of HH whose other parent does not live in the household
- 20 = spouse of HH
- 21 = unmarried children of spouse of HH where he is not the other biological parent
- 22 = unmarried children of the HH and of his spouse
- 23 = other singletons related to the spouse of the HH
- 30 = Father or mother of CM, living in the household with his partner in the household and/or their progeny
- 31 = Spouse of the father or mother of the HH
- 32 = unmarried children of this couple or to one member of this couple
- 33 = other singletons related to this couple or to one member of this couple
- 40 = child of HH or of spouse of HH, living in the household with his spouse and/or their progeny
- 41 = partner of child of HH
- 42 = unmarried child of this couple or of one member of this couple
- 43 = Son-in-law of the HH or daughter-in-law of HH whose spouse (son or daughter of HH) doesn't live in the household
- 44 = other singletons related to this couple
- 50 = Brother/sister of HH, living alone or with his spouse and/or their progeny in the household
- 51 = spouse of brother/sister of household
- 52 = unmarried child of this couple or of one member of this couple
- 53 = Brother-in-law or sister-in-law of HH whose spouse (brother or sister of HH) is not in the household
- 54 = other related singletons to this couple or one of its members
- 60 = Other relatives of HH, living in the household alone or with his spouse and/or progeny
- 61 = spouse of 'other relative' of HH
- 62 = unmarried children of this couple or of one member of this couple
- 63 = other singletons related to this couple or to one member of this couple
- 70 = Other relative of the spouse of the HH, living in the household with his spouse and/or their progeny in the household
- 71 = spouse of in-laws of HH
- 72 = unmarried children of this couple or of one of its members
- 73 = Other singletons related to this couple or to one of its members
- 80 = Person without family relation to HH, living alone or with his spouse and/or their progeny in the household
- 81 = spouse of person without family relation to HH
- 82 = unmarried child of this couple or of one of its members
- 83 = other singleton related to this couple or to one of its members

Instructions aux enquêteurs

6. Age and date of birth

Date of birth:

The date of birth of an individual indicates the day, the month, and the year of their birth. There are individuals who know the exact date of their birth, there are some who do not know the full date of their birth but know at least the month and the year of their birth.

The age of an individual is the number of years lived by this individual since the day of his birth to today.

The age in years passed expresses the number of whole years lived by this individual since his birth. The age that will be considered is the age in years passed

If we do not know the exact date of birth of an individual, but only the year of his birth, calculate the age at the birthday reached in the year by calculating the difference of years. As such, a person who was born in 2000 will be 5 years old in 2005, meaning he will have reached his 5th birthday in 2005.

Instructions aux enquêteurs

Urban or rural place of birth (CM05A473)

Fichier: CMR2005-P-H

7. Location of birth

The location of birth is, for people born in Cameroon, the quarter/district in which they were born. For people born outside of Cameroon, the location of birth if the country where they were born.

If the person being surveyed has civil status certificate or a national identity card, this information exists in those documents:

-Take this information and transcribe it in the questionnaire while respecting the rules below which define the location of birth.

If the person does not have a civil status certificate, ask him the following question:

Q. Where you born in Cameroon? If the answer is YES,

Ask the following question:

Q. What district or quarter where you born in?

-Mark the answer on the dotted line corresponding with the registration order number of the surveyed person (if it's a quarter that still exists)

If the person was born in Cameroon and knows the town he was born in, but isn't able to connect it to an quarter or a district, ask him the following question:

Q. Which administrative district or grouping is attached to the town in question?

-Do not write anything in the questionnaire. Take the information from the scratch notebook, specifying the names of those in the household and the order number of the relevant person and inform the team leader so as to find a solution together.

If the answer is No, the person was born outside of Cameroon, ask him the following question:

Q. Which country were you born in?

-Mark the answer provided on the dotted line corresponding to the registered order number of the surveyed person.

Q. In which quarter were you born, was _____ born in?

-Then ask him if this location was in a city or a town (based on the location of residence at the time of birth);

-Mark in the proper space the code for his location of birth (1=urban, 2=rural).

Example 2:

Question: "What quarter was X born in?"

Answer: "Obala".

Additional question: "Was it Obala proper or a village in the district of Obala?"

If it was a village:

-Mark 2, which corresponds to the code for a rural space.

NB. You must consider the changes that occurred after the current administrative re-zoning which may affect the quarter/district of birth of the surveyed person.

Consequently, only mark the current quarter which is attached to the town declared by the surveyed person.

-Ask for his birth country if he was born abroad.

-Mark the name of this country on the dotted line that corresponds to the registration order of the surveyed person.

Univers

All persons

Question littérale

8. Marital status _

Instructions aux enquêteurs

8. Marital status

N.B. The question on marital status is only asked to men over the age of 15 and women over the age of 12.

Marital status is defined by the existence or not of a marital relationship between two people of opposite sex. Considering laws and customs in effect, we distinguish:

Single: all people who have never been married are considered single.

Married: all people joined by law, tradition, or religion to another person of opposite sex are considered married.

Separated: all people who were left by or separated from their spouse, legally or not, but for whom the divorce hasn't been declared are considered separated; nevertheless, a polygamous man separated from one of his spouses remains married.

Divorced: all people who broke all ties (legally or traditional) which joined them to a spouse and who did not remarry are considered divorced, nevertheless, a polygamist who divorced one of his wives remains married.

Widow: All people whose spouse is deceased, and who did not remarry are considered widows, nevertheless, a polygamist with a spouse who died remains married.

Cohabitation: all people who cohabit with a person of the opposite sex without a civil, traditional, or religious marriage

The codes of the terms of the marital status variable are:

- 0 = single
- 1 = man married to 1 spouse or woman married to 1 man having 1 spouse
- 2 = man married to 2 women or woman married to 1 man having 2 spouses
- 3 = man married to 3 women or woman married to 1 man having 3 spouses
- 4 = man married to 4 women or woman married to 1 man having 4 spouses
- 5 = man married to 5 or more women or woman married to 1 man having 5 or more spouses
- 6 = cohabitation
- 7 = separated
- 8 = divorced
- 9 = widow

Q. Are you, is _____ married?

-Mark in the proper space the marital status code provided.

Instructions aux enquêteurs

9. Living situation

The concept of living/residence is linked to that of the usual home as well as to the length of time spent in that household or out of that household, which is based on the length of reference which starts at 6 months (based on the survey date).

As such, a person is considered a "resident" in the household if they have habitually lived there for 6 months or for less than 6 months but with the intention to stay more than 6 months (example: a newly married woman; a civil servant newly appointed and joined by his family). This variable allows us to class individuals based on their stay in the household.

The Codes of the terms of the living situation variable are:

- 1-Resident present
- 2-Resident absent
- 3-Visitor

A resident is considered a Present Resident if he spend the night before the first visit by the survey agent in the household. Nevertheless, a baby born the day of the visit by the surveying agent should be considered a present resident member of the household even if he is still in the hospital with his mother who is also considered a present resident in the household.

A resident is considered absent if he did not spend the night before the first visit by the surveying agent in the household. This absence should not exceed more than 6 months.

All non-resident individuals having spent the night before the first visit by the survey agent are considered visitors. The total length of his stay in the household should not exceed 6 months.

A person registered as an "absent resident" on the first visit keeps that status even if he returns to the household over the surveying period. This person can answer the question regarding himself. Similarly, a person with the status of "present resident" keep this status even if he travels after the first visit to the household. Thus after the first visit of the surveying agent, it is impossible to update the list of members of the household.

People working at night have the status of present resident if they spend the night before the first visit of the surveying agent in their place of work.

-Mark in the space provided the code of living situation of the surveyed person.

Attention: All students living in dormitories or going to school elsewhere and spending the night before your first visit in the household elsewhere must be surveyed as visitors.

N.B. Residents being held at any type of police station will be surveyed in their normal household. Conversely, prisoners will be surveyed in their communal household. Those accompanying ailing non-residents will be surveyed in the communal household whereas those accompanying residents will be surveyed in their normal household.

Instructions aux enquêteurs

10. Usual location of residence

NB.: This variable is only used for visitors (CF. Question 9 for sorting)

The usual location of residence of visitors is the quarter or district where the surveyed person lived for more than 6 months, or where he has the intention of living for more than 6 months if he has lived there for less than 6 months.

Q. Where does _____ usually live?

-Mark this name (quarter/district or foreign country) on the dotted line corresponding to the registered order of the surveyed person.

Attention: Two situations may present themselves:

a) For visitors who reside in Cameroon,

-Mark on the dotted line corresponding to the registered order the name of the current quarter or district where the visitor usually lives.

b) For visitors who reside outside of Cameroon,

-Mark in the full name on the dotted line corresponding to the registered order the name of the country where the visitor usually lives.

15. Religion

Q. What is your religion?/ What is ____'s religion?

Religion is a set of beliefs and practices which govern the relationship between a person and a divinity or in a general way, the sacred. There are conventional religions and traditional religions. The codes of the terms of the religion variable for the 3rd RGPH are:

1. Catholic: this category groups together the Roman Catholic Church
2. Orthodox: these are member of the Orthodox Church
3. Protestant: This term includes the Cameroonian Presbyterian Church (EPC), the Union of Baptist Churches of Cameroon (UEBC), the Lutheran Church, the Methodist Church, the Evangelical Church of Cameroon (EEC), the African Presbyterian Church (EPA), the 7th Day Adventist Church, the Cameroonian Orthodox Presbyterian Church, (EPCO), the Native Baptist Convention (NBC)
4. Other Christian: This term groups all other Christian religions such as Pentecostals, the True Church of Christ, the Messianic Evangelic Church of Cameroon (EMEC), the Apostolic Church, The Mission of the Full Gospel, the Living World Fellowship, The Bethel Mission, Jehovah's Witnesses, and all other Christian churches not classified elsewhere.
5. Muslim: this category groups together all those who profess to the Islamic religion, all types mixed together.
6. Animist: this category groups together all followers of animism (a belief that attributes a soul to all animals, all phenomenon, and all natural objects)
7. Other religion
- 8: Free thinker: this category groups together all those who do not claim any religion and who have their own way of thinking on this subject.

-Mark in the reserved space the religion code of the person surveyed.

16. Chronic illness/dominant handicap

b- Handicap

A handicap is the disadvantage that a person endures due to a disability or an infirmity which prevents him from fulfilling completely or partially a task that could normally be done by a person similar to him in age, sex, and different cultural factors.

One is considered handicapped if they need the assistance of specific equipment. As such, a handicapped person is one does not have complete physical or mental autonomy.

Here is a list of basic handicaps that the 3rd RGPH has retained:

Basic terms Code

No handicap 00

Deaf 01

Mute 02

Blind 04

Leprous 08

Upper limbs disabled 16

Lower limbs disabled 32

Mental illness 64

Albino 128

Other handicap 256

-Ask the following question:

Q. Does the surveyed person have a/any handicap/s?

NB: If the handicap is clearly visible, mark it and go on to the following question.

-Mark after the vertical line the handicap code or codes, on the dotted line corresponding to the order number of the surveyed person.

[Examples omitted]

Instructions aux enquêteurs

16. Chronic illness/dominant handicap

a- Chronic illness

A chronic illness is all illnesses that evolve slowly, are prolonged and remain for a long time. The chronic illnesses which are objects of study in the framework of the 3rd GRPH are:

Basic Terms Code

No chronic illness 00

Diabetes 01

Hypertension 02

Cancer 03

Asthma 04

Tuberculosis 05

Sickle cell anemia 06

Epilepsy 07

To get the response related to the chronic illness, ask the surveyed person the 7 following questions:

- Q1. Are you/is _____ suffering from diabetes?
 Q2. Are you/is _____ suffering from hypertension?
 Q3. Are you/is _____ suffering from cancer?
 Q4. Are you/is _____ suffering from asthma?
 Q5. Are you/is _____ suffering from tuberculosis?
 Q6. Are you/is _____ suffering from sickle cell anemia?
 Q7. Are you/is _____ suffering from epilepsy?

If the answer is Yes to any of these questions,

-Mark the code/s for the chronic illness/es on the dotted line corresponding to the registration order number of the surveyed person.

If at the end of the series of seven questions, the answers are No,

-Mark '00' on the on the dotted line corresponding to the registration order number of the surveyed person, meaning that the person doesn't have any of these illnesses.

-Mark a vertical line to note the difference between these answers and the handicap variable.

Question littérale

19. National literacy languages

In which national language can the interviewee read and write best? __

Instructions aux enquêteurs

19. National languages (literacy)

The question related to this variable is only relevant for people 12 years and older.

Literacy is an individual's aptitude for reading and writing, and the ability to understand a text in relation to facts of everyday life, in any language (national language, foreign language).

In the Questionnaire, we've written national languages in the plural; however, for the standard order questions, this question only relates to literacy of the main national language. Also, there is only one answer possible for each eligible individual.

-Ask if the surveyed person knows how to read and write in the any national language.

If the answer is Yes, ask him the following question:

Q. In what main national language does the surveyed person know how to best read and write?

-Mark the name of the main language declared on the dotted line corresponding to the registration order number of the surveyed person.

If the answer is No,

-Mark "no" on the dotted line corresponding to the registration order number of the surveyed person.

The national languages of Cameroon retained in 3rd RGPH are:

Instructions aux enquêteurs

20. Official languages

The questions related to this variable are only relevant for people 12 years and older.

Official languages are French and English. The question should be asked for each of the two languages. We are looking to find out if the person knows how to read, write, or speak at least one of the official languages.

For English:

Q. Does the surveyed person know how to read, write, and speak English?

-Ask if the surveyed person knows how to read English (1=Yes, 2=No)

-Ask if the surveyed person knows how to write in English (1=Yes, 2=No)

-Ask if the surveyed person knows how to speak English (1=Yes, 2=No)

-For each question asked, mark on the corresponding bubble the appropriate code.

For French:

Q. Does the surveyed person know how to read, write, and speak French?

-Ask if the surveyed person knows how to read French (1=Yes, 2=No)

-Ask if the surveyed person knows how to write in French (1=Yes, 2=No)

-Ask if the surveyed person knows how to speak French (1=Yes, 2=No)

-For each question asked, mark on the corresponding bubble the appropriate code.

Instructions aux enquêteurs

Employment status (CM05A504)

Fichier: CMR2005-P-H

Questions (Questions 27-33) related to the economic activity are only ask to people 6 years old and older

28. Activity

This variable allows you to learn if a person worked over the course of the 7 days before your first visit to the household. In other words, the week of reference is determined by the date of your first visit in the household. This means that you count 7 days back starting with the day of your first visit; and these are the 7 days that correspond to the reference week (1 week in this specific case equals 7 days).

[Example omitted]

Q. What was your activity/what was the activity of _____ over the last 7 days.

The terms of this variable are:

01 = At work: This is the situation of a person who worked at a job over the last 7 days before your first visit to the household, whether the work was compensated or not. You must note that all the people on vacation are part of this group.
[Examples omitted]

02 = Unemployed, having already worked: This is the situation of a person who has already worked at least once but did not have a job over the course of the last 7 days and who is looking for a job

03 = Looking for work for the first time: This is a situation where the person who never had a job is looking for their first job

04 = Housewife: These are all people who are exclusively looking after the household and household work, without getting a salary and without looking for work

05 = Student: These are people who regularly go to an educational establishment and who are not engaged in economic activity

06 = Person of independent means: These are people who do not work and who live exclusively off of revenue from their property of their capital.

07 = Retiree: This is an individual who no longer works and who has a retiree's pension

08 = Old person: This is an aging person who doesn't have independent means and isn't a retiree, who does not work and who is no longer looking for work and who lives off of financial assistance and the finances of a relative

09 = Handicapped: This is a person cannot work because of his handicap

10 = Idle: This is a person without work, capable of work, but not looking for a job

The codes of the terms of this variable are:

01 = worked

02 = didn't work, is looking for a job but already worked in his life

03 = didn't work, looking for a job, never worked before

04 = didn't work, housewife who is not looking for a job

05 = didn't work, student (not looking for work)

06 = didn't work, person of independent means not looking for work

07 = didn't work, retiree not looking for work

08 = didn't work, can't work or can't work anymore because of age, old person

09 = didn't work, can't work or can't work anymore because of his handicap or because of his illness, handicap

10 = didn't work, doesn't want to work and isn't looking for work

Following the order number:

-Legibly write on the dotted line corresponding to the registration order number of the surveyed person the situation of activity

-Mark the corresponding code in the reserved space

N.B. If the code is above 02, go to Q34.

If the code of the answer to question 28 (Activity) is equal to 01 (at work) or 02 (doesn't work, is looking for work and has already worked), first ask Q30 (work) then Q29 (Employment status), then Q31 (type of employment), Q32 (employment sector) and Q33 (Branch of business).

Questions (Questions 27-33) related to the economic activity are only ask to people 6 years old and older

30. Employment

Employment is the regular activity done by the surveyed person over the course of the last 7 days preceding the survey agent's visit to the household.

Q30. For those who worked during the reference week: What job did _____ do? For those without employment already having worked: What was _____'s last job?

Following the registration order:

Legibly write the employment declared on the dotted line corresponding to the registration order of the surveyed person.

NB. Clearly mark the nature of the job that the person did during the reference week or that the person did before ending up unemployed.

[Examples omitted]

NB. Avoid vague responses like:

- Farmer for all those who farm
- Engineer for all engineers
- Government employee for all those employed by the government or the State

31. Type of employment _

[Question 31 was asked of persons aged 6 years and older who reported working in the last 7 days, per Question 28.]

Instructions aux enquêteurs

Questions (Questions 27-33) related to the economic activity are only ask to people 6 years old and older

31. Type of employment

The variable "Type of Employment" is about the nature of the job or the trade practiced during the last 7 days preceding the survey agent's visit to the household. It is based off of the different types of employment on the job market while taking into account the effective legislation of Cameroon, and thus we can distinguish the modern contractual jobs, the freelance jobs, and the "atypical" jobs. The contractual types of jobs are those occupied by salaried people, in general in the modern sector. The freelance jobs are those held by intellectual or by established professionals. The atypical jobs are all those jobs that do not fit into either of the preceding categories. We could adopt for the "type of employment" variable the following different terms, defined as:

1 = Modern freelance job

2 = Job from a contract written for an undetermined amount of time

3 = Job from a contract written for a specific amount of time

4 = Entry level job, resulting from a trial contract

5 = Permanent job, resulting from no contract, oral or verbal (a manual position in the artisan, agricultural, breeder, etc. domain)

6 = Temporary job, resulting from a simple verbal agreement between two parties

7 = Seasonal job (agriculture or traditional breeder)

8 = Occasional job which is unstable (activity in an informal sector that doesn't require any type of qualifications or any significant commitment)

-Ask the type of employment done by the surveyed person (you can orient the person by reading the terms below to him)

-Mark in the indicated space the code of the type of employment cited

Sector of employment (CM05A508)

Fichier: CMR2005-P-H

Economic activity for persons aged 6 years and above
[Questions 27 to 33 were asked of persons aged 6 years and older.]

32. Sector of employment _

[Question 32 was asked of persons aged 6 years and older who reported working in the last 7 days, per Question 28.]

Instructions aux enquêteurs

Questions (Questions 27-33) related to the economic activity are only ask to people 6 years old and older

32. Employment sector

This is regarding the part of the economy where the job is performed, meaning formal or informal. In the formal sector, the management is characterized by the record keeping, having some type of taxpayers/ratepayers, etc employed. It groups together, aside from public administrations (public services), public and semipublic businesses, private businesses, jobs in international organizations, nongovernmental organizations (NGO), scholarly establishments? It is about employments in structured businesses.

The informal sector groups together activities lead by businesses and production units, individual or familial in nature in the artisanal, small business, manufacturing, or small service sectors.

[Example omitted]

NB. The informal sector does not include agriculture, breeding, fishing, hunting or harvesting. To collect the data on this variable, the following terms have been retained:

- 1 = Modern sector
- 2 = Informal sector of artisanal production
- 3 = Informal sector of public building and works
- 4 = Informal mechanical and repairs sector
- 5 = Informal sector of communication and transportation
- 6 = Informal sector of small businesses of manufactured products
- 7 = Informal sector of commodity food sales and catering
- 8 = Informal sector of personal services
- 9 = Traditional types of activities of agriculture, breeding, hunting, fishing, and forest

-Ask the person to succinctly describe the nature of the work as well as the location of the business or the establishment where he works or worked

-Determine the employment sector based on this response obtained

-Mark in the space reserved the code of the employment sector

[Question 33 was asked of persons aged 6 years and older who reported working in the last 7 days, per Question 28.]

See code list

Instructions aux enquêteurs

Questions (Questions 27-33) related to the economic activity are only ask to people 6 years old and older

33. Business sector

The business sector corresponds to the establishment or the firm where the person worked for the 7 days before the visit from the surveying agent in the household. It is also about the people without work already having worked (code 02 of Q28), of the last business sector in which they worked.

Q. What does the enterprise in which you/ _____ work or worked?

-Legibly write the business sector declared on the corresponding dotted line.

-For salaried individuals, clearly write the name of the firm, company, the employer, or the service of the surveyed person.

[Examples omitted]

Attention: In certain situations, a domestic or house servant (cook, chauffeur, gardener, etc) can be in the service of a high level individual (Governors, Director of a semipublic or private company, President of the Administrative Counsel, Prefect, Sub prefect/District Head or all other high positions of the State) all while being paid by the employer or company which employees this high level individual. In this case, the person is not a household employee, but a salaried employee of that employer or of that company. For the category of this personnel, mark the name of the employer or the company.

[Examples omitted]

For salaried individuals of the public administration and of public administrative establishments, mark the name of the Minister or of the establishment for which the person worked.

[Example omitted]

For the Health and Social action sectors, do not mark the name of the health facility or the establishment. Instead, reference the following terms.

Example 4:

- Hospital activities for people working or having worked in a health facility (hospital, health center, etc)
- Medical or dental practice (dentist's office, doctor's office, etc)
- Activities of a traditional healer
- Activities of GIC Health for people working or having worked a communal health interest group
- Activities for human health not otherwise classified
- Veterinary activities for people working or having worked on animal health (veterinary pharmacies, veterinary clinics,?)
- Social action for people working or having worked in orphanages, community center for children or distressed individuals, boarding house (nursing home, etc)

NB. This is regarding the current businesses sector for the people who worked during the seven days before the survey agent's visit to the household, and the last business sector for people without work but who have already worked.

-Do not mark vague descriptions like "Ets BABA". Insist to find out what the BABA establishment does specifically.

Number of male live births (CM05A510)

Male live births in last 12 months (CM05A514)

Fichier: CMR2005-P-H

36. Number of live births in the last 12 months (by women age 12 and older)

This question has undergone serious changes, thus you should strictly adhere to the following new instructions on how to ask the questions and mark the responses provided.

a) To start,

-Disregard the following mentions which are on the questionnaire in each of the 6 columns, these are:

Birth 1, Birth 2, Birth 3, etc.

Name of the child, etc.

b) Each of these 6 columns is now reserved for the collection of data related to the live births of a woman aged 12 years or older having occurred over the course of the last 12 months. As such, one column, questions Q34 and Q35, are not recorded: Q34=Empty and Q35=Empty, if that means that each column is reserved to the recording of the data related to a man or to a young girl who is less than 12 years old: check the accuracy of this situation. If it is true, then leave Q36 also "Empty". If it's false, proceed to make the necessary corrections, then follow the following instructions since you are dealing with a woman who is 12 years or older.

c) The individual is a woman age 12 and older. Questions Q34 and Q35 are recorded. If Q34 is empty and Q35 is empty, that means that we recorded the data related to the number of live born children and the number of children still alive that a woman aged 12 and up has already had. Under these conditions, you must ask this woman Q36, the following question:

Q. Did you/did ____ have any live births over the period of time between November ____ 2005 and November ____ 2005?

If: Q34=Q35=00, this woman never had live born children over the course of her life, consequently over the course of the last 12 months she didn't have any live births; nevertheless, ask her the same question in the formation that follows:

-Do you confirm that you never had any live births over the course of the last 12 months?

If the answer is Yes, then:

-Mark "0" in each small space facing the "M" and "F" which symbolize the sex of the children who would be live born over the course of the last 12 months, in the column reserved for the recording of the date about this woman.

If the answer is No, meaning that the woman claimed to have had one live birth over the course of the last 12 months, ask her this question:

Q. Where is this child?

If there is confirmation that the child was live born over the course of the last 12 months, then,

-Ask her the sex of this child and mark "1" in one of the cells facing the "M" or "F" for the sex of the child.

-Remember that there is an inaccuracy regarding the answers obtained before Q34 and Q35; given the new data, make the necessary corrections.

If: Q34 "M" > 00 and/or Q34 "F" > 00, this woman has already had live born children over the course of her life; ask her the following question:

-Among the "n" male children that you have had, how many were born over the course of the last 12 months?

If the response obtained is a number less than or equal to Q34 "M", then

-Mark this number in Q36 in the small cell facing the "M" in the column reserved for the recording of data related to this woman;

-Among the "n" female children that you have, how many were born over the course of the last 12 months?

If the response obtained is a number less than or equal to Q34 "F", then

-Mark this number in Q36 in the small cell facing the "F" in the column reserved for the recording of data related to this woman.

N.B: The children less than one year old recorded as member of the household and whose mothers do not live in the household (because of death or departure) will not be counted in the events of the last 12 months.
