PRESENTATION NOTE OF THE NOMENCLATURES

Various nomenclatures have been elaborated mainly in order to facilitate the organization of the data collection. Their aim for this survey is essentially to enable a harmonized codification of administrative units, activities and products and variables concerning the labour market in Cameroon.

The present document includes the nomenclature of administrative units, employments, professions and trades, economic activities, activities and products and survey areas. Each of these nomenclatures concerns specific sections of the questionnaire.

The nomenclature of administrative units concerns:

- For the household questionnaire: **SECTION 00** about « General information » and questions **Q1, Q5** and **Q6** ; **SECTION 07** about « residential mobility of the household » and question **Q5**;
- For the Council, Health, Basic education and Secondary education: **SECTION 00** about « general information » and questions Q1 to Q3.
- The nomenclature of survey areas concern **SECTION 00** about « general information » question **Q2** for the household questionnaire.

The other nomenclatures concern exclusively the household questionnaire.

- The nomenclature of employments, professions and trades concerns **SECTION 03** «Economic activity of household members and access to loan », notably question **Q8**;
- The nomenclature of economic activity as well as that of activities and products concern **SECTION 03** and question **Q9**.

It is important to carefully read the usage note that precedes some of these nomenclatures in order to master the little subtleties that are indispensable for the good coding of target variables.

NOMENCLATURE OF ADMINISTRATIVES UNITS

This nomenclature gives:

- The region code (question Q1 of section 00) for all the questionnaires ;
- The Division code (question Q5 of section 00 for that household questionnaire and question Q2 of section 00 for other questionnaires) and;
- The subdivision code (question Q6 of section 00 for the household questionnaire and question Q3 of section 00 for other questionnaires).

NOMENCLATURE OF EMPLOYMENTS, PROFESSIONS AND TRADES

This nomenclature concerns **SECTION 03** on « Economic activity of household members and access to loan» and the codification of question **Q8** « *What is the name of the post, the task of the main employment that (Name) has exercised during the last 7 days or that he/she usually exercises? ».*

This nomenclature picks up what the individual does in his/her employment: his/her task or function. These notions must not be mistaken with the training of the individual.

Example: A senior technician of telecommunication who carries out commercial activities is coded as a trader and not as a technician.

It is important to make the difference between the levels of training and the functions in the enterprise. An electrician technician in the enterprise is the one occupying that function in the enterprise. Take note here that he may not have the diploma of an electrician technician.

This nomenclature is divided into 8 big items and is coded on 4 digits.

NOMENCLATURE OF ECONOMIC ACTIVITIES

This nomenclature concerns **SECTION 03** «Economic activity of household members and access to loan» and the codification of question **Q9** « *What is the main activity of the enterprise where (Name) exercises his/her main employment and which type of product does it produce/supply? ».*

I. Presentation of the nomenclature

The term activity characterises **what a production unit or an enterprise does**. It is different from the notion of employment, which characterises what the individual is doing: his trade, his task, his function, etc. For example, an individual who works in the Brasseries du Cameroun and goes for distribution is a driver by profession; **code 6605** in the nomenclature of employments. The activity of the enterprise where he works is “Manufacturing of beer and malt” **code 131** in the nomenclature of activities

In order to better codify the activity, you must describe precisely what the production unit does and the main products and / or services born from this activity.

This nomenclature is divided into 4 big posts and is coded on 3 positions.

1.The activities of the primary sector

This group is made up of activities that consist in exploiting natural, vegetable, or animal resources. These activities are agriculture, breeding and hunting, forest exploitation and silviculture. Their codes start from **011** to **042**.

Particular case

Tapping palm wine is considered as an activity of transformation, it's coded in “Manufacturing of other alcoholic drinks” (**code 132**).

2. The activities of industries

They are extraction, transformation of raw material into finished material, production and distribution of electricity, gas and water, and building works. Their codes go from **050** to **312**.

3. Commerce

This group corresponds to the purchase/sale in the state i.e. without transformation of goods. It includes motorcycles and car trade, accessories and fuel trade, wholesale trade, retail trade, and the activities of intermediaries of trade. It corresponds to **codes 321** to **325**.

The post entitled “Other wholesale trade” (**code 324**) equally includes the intermediaries of wholesale trade. The same thing is applied to “Retail trade of other products” (**code 325**) which includes the intermediaries of the retail trade.

Particular case: The retail sale of meat, without transformation, is a trade activity: “retail trade of others **foodstuffs**” (**Code 325**). If on the contrary, the individual is a butcher who buys live animals, kill and cut into pieces to sell either in retail or whole sale, the activity of the production unit is industrial;” production, transformation and conservation of meat made products ”(**code 071**).

4. The activities of service

They are activities of catering, transport, telecommunication, financial and insurance activities, services to enterprises, public administration activities, education, health, associative activities, personal services, etc. This item corresponds to **codes 331** to **440**.

II. Remarks on the use of the nomenclature

The risks of confusion are high between the different sectors of activities as seen in the example below.

1. *Distinction between the primary sector or industry and trade*

The primary sector activities or industrial sector activities should not be mistaken with trade when the products are sold by the producer himself.

A person who rears and who sells his cows in the market is not trading. His activity is of the primary sector: "Cattle rearing" (**code 021**). It is the same thing for the female farmer who sells plantains that she produces. The activity here is "bananas and tubers farming" (**code 013**).

The woman who produces fritters and who sells them herself is by so doing, working in an enterprise of production "Bakery, pastry making and biscuit factory" (**code 111**) and not in a trade enterprise.

The lady who sells cassava sticks (*miondo, mintumba*) is by so doing working in a production unit of trade, if she buys cassava in bags in order to retail it in the market (**code 325**). If she buys cassava or cultivates or farms it, then makes "cassava sticks (*miondo, mintumba*)" and retails them in the market, she is by so doing working in an industrial production unit: "Cassava processing" (**code 083**).

2. *Distinction between services and trade*

The production unit of the woman who roasts fish or the one who sells fritters, beans and pulp has a "catering" activity (**code 322**) and not a trade activity.

3. *Distinction between services and industry*

An own-account seamstress is carrying out an industrial activity if her turnover is mainly found in the making of dress "Making of clothing articles" (**code 155**).

If on the contrary, she mainly mends one or many second hand dresses, it is therefore an activity of service: "Other repairs of personal goods" (**code 423**).

The shoemaker works in an industrial production unit, if the main activity consists in the making of shoes "Manufacturing of shoes" (**code 162**). If on the contrary, he mainly mends shoes, it is an activity of service "Other repairs of personal goods" (**code 423**).

4. *Other remarks*

Works related to plumbing repairs, are put under "Installation and finishing work" (**code 312**).

- Ministries, delegations and local collectivities are classified in item "Activities of general public administration and services given to the whole collectivity" (**code 391**). The Funds for Stabilisation of Hydrocarbon products (CSPH) and the Cameroon Sinking Funds (CAA), the Central Bureau for Census and Population Studies (BUCREP) and the National Institute of Statistics (NIS) are classified in this group.
- Services for education (primary schools, high schools, secondary schools, etc) whether private or public are classified in item "Education" (Code **400**). The supervising ministry, for example the Ministry of Basic Education or that of secondary education are in code **391**
- Health Services (health centres, dispensaries, consulting room, lab for analysis, etc) are coded in item "Activities for human health" (**code 411**) whereas the Ministry of Public Health is classified in **code 391**.
- Public enterprises are classified according to their main activities, Consequently,
 - o The CRTV is in « Radio and television activities » (**code 352**).
 - o The SCDP (Société Camerounaise des Dépôts Pétroliers) is in « Annex and auxiliary activities of transports » (**code 346**).
 - o CNPS (National and Social Insurance Funds) is in « Obligatory social security » (**code 392**).

- For people working for a household as a house servant (driver, cook, watchman, etc.) the activity of the enterprise is “Domestic services” (**code 426**).
- There is an unclear limit between what one can or cannot describe as transformation. In these cases, see your supervisor where there’s any doubt.

NOMENCLATURE OF ACTIVITIES AND PRODUCTS

This nomenclature concerns **SECTION 03** « Economic activity of household members and access to loan » and the codification of question Q9 « *What is the main activity of the enterprise where (Name) exercises his/her main employment and which type of product does it produce/supply? ».*

It makes easy the identification of some branches of activity from products or services offered by the enterprise. It includes 44 big groups of products which are presented in the table below.

Groups of products		Page of nomenclature	Groups of products		Page of nomenclature
1.	Products from food crops Agriculture	37	23.	Basic metallic products and metal works	51
2.	Products from Breeding and from Hunting	38	24.	Machines, electrical apparatus and material n.c.e	53
3.	Forest product	39	25.	Audio-visual and communication equipment and apparatus, medical, optical, and clockwork tools	54
4.	Products from fishing and pisciculture	39	26.	Transport material	55
5.	Products from the extraction of hydrocarbons	39	27.	Furniture, products of various industries	56
6.	Other products from extraction	40	28.	Repair and installation of machines and equipments	56
7.	Meat and fish	40	29.	electricity and energetic tools	57
8.	Product from grains and amylaceous products	41	30.	Water and sanitation	57
9.	Cocoa, coffee, tea, sugar products	41	31.	Building works	57
10.	Oil seed and animal feed	42	32.	Wholesale and retail trade, repair of vehicles	58
11.	Cereal products	42	33.	Restaurants and hotel services	59
12.	Milky products; fruits and vegetables and other food products	42	34.	Transport, post and mailing	59
13.	Drinks	43	35.	Services of information and communications	61
14.	Tobacco	43	36.	Financial services	62
15.	Products from textile industry and clothing	44	37.	Estate services	62

17.	Wood industries except manufacturing of furniture	46	39.	Services of public administration and of social security	64
18.	Papers et Cartons; Products edited and prints	47	40.	Education	65
19.	Products of refining, coking and nuclear industry	48	41.	Health and social action services	65
20.	Chemical products	48	42.	Other collective, social and personal services	65
21.	Plastic and rubber products	50	43.	Services of extraterritorial organizations and institution	66
22.	Other non-metallic mineral products and material for construction	51	44.	Territorial correction	67

Each of these groups includes the sub-groups including post of products. Each product has a 4 digit code among which the first three determine the sub-group, and the fourth represents the serial number of the product in the sub-group.

The nomenclature does not bring out all the products that can be found in enterprises or unit of production. This is impossible. When the interviewer is faced with the codification of a product which is not cited in the nomenclature, two cases can arise:

- a) In the nomenclature there is a good (or service) which is very close to that which is observed. It will then be codified in the same manner. So an item like "female cow meat" wasn't provided before, but it is clear that the purchase of female cow meat must be codified in the same manner as «Cow or calf meat with or without bone».
- b) There isn't a good (or service) which is very close to that which is observed, It will then be codified as "Other xxxx n.c.e." in the same sub-group. Generally, the headings (or the headings groupings) end by rows with the terms "Other xxxx n.c.e."

Remarks: For some headings, no line comprising "Others....., n.c.e» will be found.

In other not to forget, the interviewer must codify the products in the evening, or latest, the next day of the interview, away from the respondents' residence in order not to waste their time.

Remarks on the usage of the nomenclature

The interviewer will have to avoid all confusion during the codification of products. For example, *the loincloth material and the loincloth garment*.

The untransformed loincloth material is **coded 1531** «*the cotton cloth or jersey* » or **1532** «*Clothes and jersey of other textiles* ». Whereas the loincloth transformed into a dress is **coded 1551** "*Textile dress*" (*Men over garment*), (*women over garment*), (*children clothing*).

Attention: The call box service (calls, transfers of airtime, **sale of prepaid cards**, etc.) is coded **3540** « service of telecommunications (including call box) ».
